Summary

Software Developer with 2+ years of experience building scalable mobile and web applications using React Native, React.js, Node.js, Express.js, and MongoDB. Proven track record of delivering production-ready features including REST APIs, WhatsApp Flows, and AI-driven applications, with a focus on user engagement and reliability.

Skills

Languages: JavaScript, TypeScript, Python **Frameworks:** Node.js, Express.js, React Native, Expo

Libraries: React.js, Tailwind CSS **Databases:** MongoDB, SQL **Tools:** Git, GitHub, Postman

Experience

Software Developer Engineer

07/2024 – Present

Leher Sustainable Agri Pvt. Ltd.

Gurugram, Haryana

- Developed WhatsApp Flows for order creation and feedback collection, automating bookings and increasing them by 30%.
- Launched a referral program using Branch.io deep links, growing the user base by 20%.
- Built a CI/CD pipeline to deploy the backend on AWS ECS via Docker images and automated task-definition updates, reducing deployment time by ~60% and removing manual release steps.
- Engineered an AWS Lambda function to stream error logs to Slack, reducing error-detection time by ~40%.

Full Stack Developer Intern

09/2023 – 05/2024

Leher Sustainable Agri Pvt. Ltd.

Remote

- Designed and implemented 10+ RESTful API endpoints using Node.js and Express.js, powering core features of the Leher platform.
- Modeled and integrated MongoDB schemas with indexing and query optimization, cutting query response time by ~30%.

Projects

Clawkit | TypeScript, Bun, LLMs (OpenRouter), Telegram Bot

- Built an AI coding assistant that reads, plans, and edits code in the current workspace using LLMs via OpenRouter, driven either from an interactive terminal CLI or remotely through a Telegram bot for on-the-go use.
- Added approval-gated edits across Ask, Plan, and Agent modes, staging every file change as a reviewable diff before writing to disk, with optional Firecrawl-powered web search and scraping to enrich planning.

PocketLM | React Native, Expo, TypeScript, on-device LLM

- Developed a fully offline AI chat app that runs local LLMs directly on-device via llama.rn, delivering token-by-token streaming responses with no API calls or backend and full functionality in airplane mode.
- Engineered multi-chat management with persistent storage via MMKV, markdown rendering with code blocks, and a system-aware dark/light theme, all optimized for privacy-first inference on mid-range mobile devices.

Education

B.Tech in Computer Science and Engineering

07/2024

Pranveer Singh Institute of Technology

CGPA: 7.2

Intermediate (Class XII)

07/2020

Harmilap Mission School

91%

High School (Class X)

05/2018

Harmilap Mission School

88.8%

Achievements and Certificates

- Solved 500+ problems across HackerRank, CodeChef, LeetCode, and GFG Practice.
- Google Certificate of Foundations of Project Management – [Coursera](#).
- HackerRank Certificate of Problem Solving – [HackerRank](#).
